

## Micro Capital Loan Success Stories 2022

By: Emily Reed

### Soft Corner Midwifery:

Soft Corner Midwifery is a reproductive healthcare center offering holistic gynecology, conception, pregnancy, labor, and postpartum care. Soft Corner Midwifery was born out of a demand for an empowering and safe space for all those in need of reproductive health care. This is a place specializing in personalized care for each person's reproductive health care needs. Morgan Miller moved to the area about three years ago where she saw a need for an all-inclusive reproductive healthcare and midwifery center. She decided then to open her own business.

As her business grew, Morgan took on more services and a new location. As she transitioned from renting to owning it was important to remain in Bath. The culture of Bath has been very supportive of midwifery and what her business offers. While the business works to flip the culture of midwifery and provide reproductive health care to all, it's important for them to remain in Bath. That's why Miller took advantage when the Micro Capital Loan became available. The loan was a game changer for her as it aided in purchasing small medical equipment vital to the services she offers her clients. The low-interest rate and great communication

with the application process helped in growing her business.

Owning a small business can be scary and come with many hidden costs but the Micro Capital Loan presented by Bath Development Corporation has allowed Miller to anchor in Bath. Her business is excelling with hopes of opening a second location soon. Miller is grateful to the Bath community for embracing her and Soft Corner Midwifery as a whole.
